

# Christopher

-He has a behavioural disability. Because of this he can't lie and he also hates being touched, he can't understand facial expressions and he struggles to make eye contact .

-He is very smart and he loves anything to do with the universe and maths is meant to be like a comfort blanket to him especially when he feels down.

His Dad is abusive towards him. Christopher finds letters from his Mum which makes him feel like his father betrayed him.

-He moves to his mother's house in London and then they move back to Swindon (he has an accent).

-He believed that his Mum was dead but then found out that she was alive and the reason he was told she was dead was because she had an affair.

-He is accused of killing a dog and he gets arrested for it. He gets really curious about who killed the dog so he goes out on the streets asking people if they know what happened.

-The play is set in 2003

-He is 15 years old

-He struggles to understand or relate to humans so he finds it easier to understand animals.
